Instructions:

Using the population counts shown on the map, draw lines grouping or dividing neighborhoods to total as close to the target population per district (14,735) as possible. Deviations of up to 5% (13,998 to 15,472) may be acceptable if needed to keep a neighborhood together or to achieve another criteria-related goal.

It is ok to indicate that you wish to divide a neighborhood, but please note along what road(s) and/or what population counts you wish to see the division.

Please drop off, fax, or scan and email your proposal by Thursday, March 12th at 5:30 p.m. to:

Note: this plan proposes eight split census blocks -- one at the NW end of District 3; two at the east end of District 1; and five zero-population splits around Elings Park and Arroyo Burro Park. But the online mapping system cannot show split census blocks. So the online version looks slightly different, but has the same demographics. This version, with the split census blocks, is the official proposal.
